

FAISAL HASAN

Flutter Developer | Android & iOS Developer

 faisalhasan.dev@gmail.com |  01644485591 |  Farmgate, Dhaka, Bangladesh |  github.com/fhfaisal

PROFESSIONAL SUMMARY

Flutter developer with 2+ years of production experience building Android and iOS applications across healthcare, fintech, SaaS, and commerce platforms. Specializes in Firebase integration, REST APIs, biometric authentication, and AI-assisted mobile workflows—proven ability to ship on both Google Play Store and Apple App Store.

PROFESSIONAL EXPERIENCE

Analyzen Bangladesh Limited *Dec 2024 – Present*

Flutter Developer

- Developed and maintained scalable Flutter applications for CREED, CM App, and Microzen — covering commerce, SaaS, and financial collection platforms.
- Integrated Google Maps, Stripe payments, deep links, push notifications, and Firebase Analytics into production apps.
- Implemented Google ML Kit OCR for automatic NID data extraction, streamlining user onboarding workflows.
- Built biometric fingerprint authentication module for secure user registration and identity verification.
- Collaborated with backend and product teams to deliver production-ready features on tight timelines.
- Managed full Android and iOS release cycle via Google Play Console and App Store Connect.

Healthcare Information System Limited *Jul 2024 – Nov 2024*

Flutter Developer

- Developed MDaktar — a smart patient management app with appointment scheduling and medical records.
- Integrated Agora SDK for real-time video consultations between patients and physicians.
- Implemented bKash payment gateway and Firebase Cloud Messaging for notifications.
- Architected REST API-driven appointment and medical record modules using GetX and SharedPreferences.

Envision Technology Limited *Nov 2023 – Jun 2024*

Flutter Developer

- Built telemedicine features for the TeleDaktar platform using Flutter and RESTful APIs.
- Integrated Agora SDK for real-time consultations and Firebase Cloud Messaging for push notifications.
- Improved app performance and led the Play Store deployment process.

OPEN SOURCE / PACKAGES (PUB.DEV)

flutter_biometric_finger — Flutter Biometric Fingerprint Plugin

- Built a Flutter plugin for biometric fingerprint scanner integration using native Android platform channels.
- Integrated native SDKs to capture and process fingerprint data; implemented device communication and verification workflows.

custom_dropdown_pro — Searchable Dropdown Package

- Fully customizable searchable dropdown for Flutter supporting BottomSheet, Dialog, and Overlay presentation modes.
- Features async search, input validation, and programmatic controls.

PERSONAL PROJECTS

- E-Commerce App — Flutter + Firebase with full auth flow and cart system.
- Cinepedia — Movie discovery app built on the TMDB API.

- Flutter Boilerplate — Clean MVVM starter template using GetX and Bloc.

TECHNICAL SKILLS

Languages & Framework: Flutter, Dart

Backend & APIs: Firebase (Auth, Firestore, FCM, Analytics), REST APIs

State Management: GetX, Bloc/Cubit

SDKs & Integrations: Agora SDK, Google Maps API, Google ML Kit, Stripe, bKash

Architecture: Clean Architecture, MVVM, Platform Channels, Plugin Development

Deployment: Google Play Console, App Store Connect

Tools: GitHub, GitLab, Jira, ClickUp

AI & Automation: AI-assisted development, Prompt Engineering, AI Workflow Integration

EDUCATION

Bachelor of Science in Computer Science & Engineering *2019 – 2023*

Daffodil International University, Dhaka

CERTIFICATIONS

Mobile App Development *July 2023*

BASIS Institute of Technology & Management (BITM)
